

# 100GB Hard Drive Upgrade For Video iPods Now Available

Contributed by  
Tuesday, 27 March 2007

PDASmart has announced the immediate availability of a 100 gigabyte hard drive upgrade for the iPod Video.

The PDASmart 100gb upgrade installs in an existing 60gb or 80gb iPod Video without any modifications to the case. A new rear casing is available for the 30gb model to allow for the slightly larger hard drive size.

The upgrade extends iPod storage capacity to 25,000 songs or allows for 125 hours of video storage.

Prices start at \$275.

You can send your iPod Video into the PDASmart iPod Repair Center or order a do-it-yourself kit which includes the tools that are needed.

The PDASmart 100gb Upgrade is compatible with the Apple iPod Video 30GB, 60GB and 80GB models. The do-it-yourself kit includes the Toshiba 100gb drive and all of the...
